

Organ Transplantation

Online: 6th Jan-16th Feb 2020
Barcelona, Spain | Face-to-face: 9th-13th March 2020

EDUCATIONAL METHODOLOGY

The course can be provided as following:

- Online:** The online modality employed involves the development of a flexible and interactive online learning action, promoting a continuous building of knowledge and development of skills. The course curriculum will be available throughout the online training program, and will be structured in topics for a better assimilation of the key concepts. Pre-course evaluation along with self-assessing individual activities and final evaluation will enable participants to demonstrate the systematic application of the knowledge acquired.
- Blended:** Face-to-face seminar with theoretical classes and practical simulations held in Barcelona + online training. During the face-to-face seminar the course contents will be introduced and will be deeply developed through the online module.

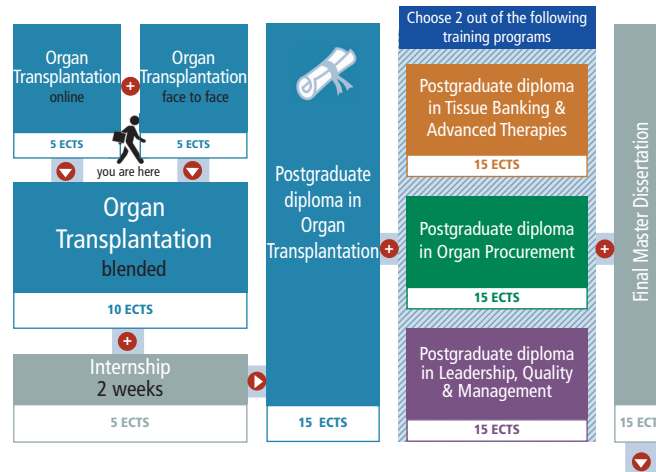

ACADEMIC QUALIFICATION

The blended training program will be awarded with a TPM diploma of 250 hours equivalent to 10 ECTS of the International Master in Donation and Transplantation of Organs, Tissues and Cells (University of Barcelona - UB).

OBJECTIVES

- To improve participants' knowledge on acute and chronic kidney, liver, pancreas, heart and lung failure and adequately asses referred patients for transplantation.
- To provide participants with the knowledge of the principles of pre-op preparation (bench preparation), preparation of implant site (anatomic references including variations and anomalies), as well as common intra-operative challenges and variations.
- To identify and treat post-op complications: drug side-effects, infection, rejection, complications, recurrent disease.
- To provide knowledge on the surgical procedures (organ specific) and post-operative care of living donors.
- To improve short and long term follow-up of the living donor with attention to physical and psycho-social well-being and to facilitate knowledge on living donor registries.

Further TPM training offer

International Master in Donation and Transplantation of Organs, Tissues and Cells

60 ECTS

CONTENTS

- General aspects**
 - Immunology basics and Immunosuppression
 - Infections and malignancies
 - Anesthesiology
- Organ specific: Kidney, Liver, Pancreas, Heart, Lung**
 - Indications and Waiting List
 - Organ evaluation and surgical procedure (techniques and surgical complications)
 - Postoperative management and medical follow up (early/late & histopathology/radiology)
- Living donation**
 - General aspects of living donation
 - Kidney and liver living donation
 - Living donor registries

ADDRESSED TO

Health care professionals involved in any of the phases of the on-going organ transplantation programs.
